Uniform Vertical Illumination on Walls  
For Delightful Indoor Atmosphere

Vertical illumination is becoming more and more important for architects and lighting designers. It is important for architects because it reveals the feel of the space, and helps the place to become even more inviting. It is important for shop owners because it makes the shop become more visible and appear brighter from outside. In an office it helps to provide better visual comfort.

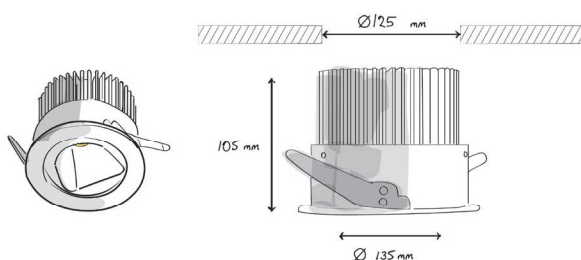

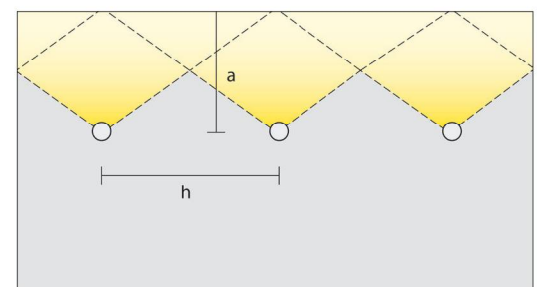

Vertical plants are becoming more popular in modern days. Uniform wallwashing makes them more visible and increase the liveliness of the place.

In an art gallery with varying objects, uniform vertical illumination helps to create a neutral space and illuminate objects of different size can be more visible.

In order to have uniform lighting, it is best that the distance between two light fixtures are 1/3 of room height. Valman fixtures are a perfect solution for walls up to 6 meters

| Order CODE  | Power (W) | Luminouse flux (lm) | CRI (Ra) | CCT (K) | Body Color |
|-------------|-----------|---------------------|----------|---------|------------|
| F160W3030AS | 30        | 2700                | >80      | 3000    | White      |
| F160W3040AS | 30        | 2750                | >80      | 4000    | White      |

\* Customized body color and other color temperatures are also available upon request
