The Light Idea

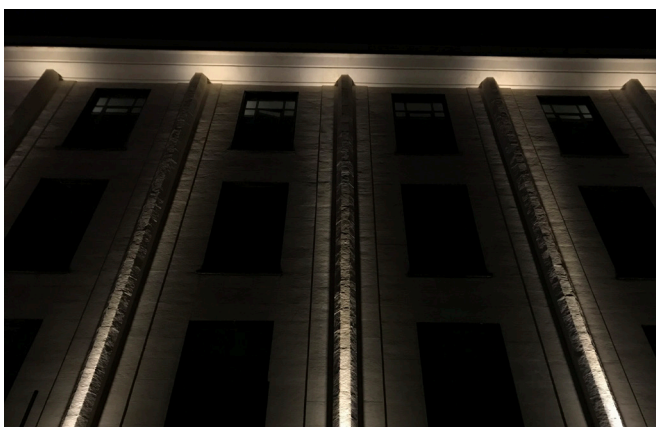

Vaswa Maxi XS

An Extreme Narrow Spot Projector
For Delightful Outdoor Atmosphere

Vaswa Maxi XS

Vertical elements in exterior environments can be highlighted if they are illuminated with narrow beam up lights. Finding a right light source for vertical element of more than 6m, is a common challenge since it becomes very difficult to provide uniform lighting along the element. Vaswa Maxi XS is equipped with an advanced high end optic which generates an extreme narrow beam of light. Perfect solution of illumination of vertical columns and high trees like palm. Due to this specific lens, there is almost no spill light and the the luminaires is very efficient and it has very low energy consumption.

High lighting columns in historical buildings gives them a sense of drama and emphasizes the size of dimensions of the building.

Sometimes there are small areas on the facade which need to be illuminated from a far distance. Vaswa Maxi XS is an ideal choice for this.

Easy to tilt the luminaire for perfect aiming.

Luminaire has an IP65 rating which makes it suitable for outdoor applications, Lenses are made of PMMA, so they are resistant against sunlight.
